from MacGAMUT, Inc:**

Individuals may order directly using  
a credit card, either online at  
**www.macgamut.com** or by  
toll-free phone: **1-800-305-8731**

**Lots more info at: [www.macgamut.com](http://www.macgamut.com)**

## You may choose to adopt MacGAMUT 6 as a course text

Most instructors elect to adopt MacGAMUT as a course requirement, ordering copies of the software through their bookstores, just as they would any other text. Students then purchase their individual User Disks (suggested retail price, \$40) at the bookstore when they buy their other course texts.

Individual disk ownership offers you and your students the maximum benefit from MacGAMUT. You can incorporate the software's mastery-based Ear-training, Written, and Keyboard drills into your course syllabus, and each student can work at his/her own pace outside of class to reach the goals you have set. This option permits students to take full advantage of the software's portability, using MacGAMUT to develop their proficiency whenever and wherever they have access to a computer.

Each MacGAMUT CD includes installers for *both* Mac and Windows, and there is no limit to how many times a student may install the software. Students may move freely among various computers, using both platforms interchangeably. Both you and your students have a secure record of all their work with MacGAMUT, recorded in their individual startMG6.mgs files.

When you place your bookstore order, please e-mail [office@macgamut.com](mailto:office@macgamut.com) or phone **1-800-305-8731** to let us know. We will send each instructor who will be using the software (graduate teaching associates, too) a *FREE* Instructor Disk Set, consisting of an Instructor Disk and a complimentary User Disk for instructor use.

The cost to your students for unlimited drill and practice in Ear-training skills and in the basic elements of Written and Keyboard Theory is very likely much less than any other textbook they will buy: **the suggested retail price for a User Disk is only \$40, and the total cost to your department is \$0.**

## You may choose to install MacGAMUT 6 in a departmental computer lab as a learning resource

Some instructors choose not to adopt MacGAMUT as a course text but, instead, they make the software available to their students as a resource in a departmental computer lab. Because of MacGAMUT's low price, we do not offer site licenses, but your department may purchase any number of User Disks for a computer lab. Institutional purchases of 5 or more User Disks are discounted 20% (for a net cost of \$32 per disk) and include a free Instructor Disk and free shipping. As an example, you can equip a five-workstation lab for only \$160, a savings of \$53 off retail prices!

For a computer lab installation, we require that your department purchase one copy of MacGAMUT for each computer the software will be installed on, and only one "working" startMG6.mgs file is permitted for each disk purchased. The number of students who may use MacGAMUT simultaneously is, therefore, limited to the number of copies you have purchased for your lab.

Of course, without having their own individual startMG6.mgs files, your students will be limited to using MacGAMUT only in the lab, so they cannot exploit the software's portability by using it on their own computers at their convenience. And, since each start file in a lab installation is shared by multiple students, the software may only be used for practice, not for mastery-based learning. For the same reason, you do not have individual record keeping with shared start files, so you cannot monitor each student's effort and achievement.

Even with these limitations, however, a lab installation can provide your students with a valuable learning resource **at minimal cost to your department and at *no* cost to your students.**

## You may choose to recommend MacGAMUT 6 to individual students

Finally, some instructors choose neither to adopt MacGAMUT as a course requirement nor to purchase disks for a departmental lab installation, but they encourage individual students needing extra work to purchase the software and use it on their own. **For only \$40** (what they might pay for only a couple of hours of private tutoring), your students can have *unlimited* hours of mastery-based drill and practice in essential Ear-training skills and in basic Written and Keyboard Theory, working at their own pace and at their own convenience.

## Even if you choose to adopt MacGAMUT 6 as a text, your students may want to order the software directly

Many bookstores these days take a “mark-up” on textbooks higher than the traditional industry standard of 25%, inflating the cost of MacGAMUT beyond the \$40 suggested retail price. If you find that your bookstore is charging more than \$40 for each MacGAMUT CD, you may want to suggest that students order directly from MacGAMUT, Inc.

Students may order using a credit card either online at **[www.macgamut.com](http://www.macgamut.com)** or by calling toll-free: **1-800-305-8731**. Orders ship via First Class Mail, and most go out the same day the order is placed.

Often, individual students pay less by ordering directly (even with the shipping fee included) than they would at the bookstore. And, if a number of your students go together, placing a single order for 5 or more User Disks, the 20% quantity discount and free shipping reduces their net cost to ***only \$32 per disk!***
